## India Community Foundation Third Annual Golf Scramble

Following the round of golf, everyone is invited to enjoy a dinner buffet, which will be followed by prize distribution.

Many people do not associate cancer with children. It is just an unthinkable horror. It's easy to dismiss the idea by saying, "This will never happen to my child." Unfortunately, it happens more often than we'd like to believe

- 1 in 330 Americans develop Childhood cancer by age 20.
- It is the *leading cause of death* due to disease in children in the US.
- Up to 75 % of childhood cancers are cured today.
- 1 in 250 Americans is a survivor of childhood cancer
- Only 3 percent of funds from the federal research funding programs go to childhood cancer.

Unlike adult cancers, treatment of childhood cancer is a lot more intensive and places a huge burden on the parents and siblings of patients. Whatever relief we can provide in the form of low cost housing as done through Ronald Mcdonald charities, food donations, or monetary donations to defray costs related to transportation or to have better playroom equipment in the cancer wards etc go a long way in providing much needed relief to the families.

There are only two groups in KY who care for childhood cancer: one is University Pediatric Foundation, Louisville and the second one is in Lexington. Our center services patients from majority of the state and southern Indiana.

Last year ICF Golf Scramble raised \$1800 for James Brown Cancer Foundation, thanks to great sponsors, donors and participants. Please help make this year's event more successful!

All proceeds from this year's Golf Scramble will benefit University Pediatric Foundation (Pediatric Hematology/Oncology).

Please visit <http://www.curesearch.com> for more details on childhood cancer research and how you can get involved.
